

# Apex PMS

Property Management System  
Front Office & Rooms Management  
Channel Management Integration

World Class PMS for hotels, lodges, guest houses, B&B's and resorts  
for complete management of your establishment

## Why Apex PMS?

Apex is a world class Property Management System (PMS) developed according to Open Travel specifications. Apex is the complete front of house solution with a friendly Microsoft 'look and feel' for your staff's convenience. Key attributes include ease of use and low training requirements. Front desk can access all functions and guest information from one screen. Apex has been developed for all types of hotels, lodges and resorts and is suitable for any sized property, ranging from 10 Rooms up to 500 Rooms. HTI currently supports over 200 small, medium and large hotels and lodges using Apex PMS.

### Primary Features:

Reservation Management; Reservation Lookup; Room Chart; Room Availability; Room Rack (Digital Whitney Rack); Reports Package for all Management, Financial, Housekeeping and Property reports, as well as INTEGRATION to other management applications, including:

- POS and Stock Control System (PlusPoint, Aloha etc.)
- Telephone Management Systems (MAN3000, Midas, Teltrace, TigerTMS etc.)
- Accounting Software (Pastel, AccPac, Great Plains, Sun Accounting, QuickBooks etc.)
- Activities Module
- Functions and Banqueting

## *Powerful and Easy to Use!*

*Apex is ideal for small to large Guest Houses, B&B's, Hotels and Lodges. The application supports a multi-property configuration given suitable networking is in place, hence Apex is a leading PMS and is 'best in class' for total functionality and ease of use.*

## World Class Front Office Functionality

Apex manages all front office functions including guest accounting, housekeeping, banqueting and conferences, timeshare, debtors as well as guest history. All previous guests at the hotel will have their details and memo's saved in guest history at 'check-out'. This makes returning guests easier to capture during the reservation stage as well as during 'check-in', all information will be provided to the front office receptionist and automatically populated from guest history records.

All Reservations are viewable on one screen. When front office needs to make an amendment to an existing reservation, check a guest in or out, post a charge or payment; they can access all in-house and future reservations from here. Filters are provided to search for reservation and/or guest details.

*Developed by Hoteliers,  
for hoteliers!*

## Reporting and Business Intelligence

Apex offers over 100 different financial and operational reports for a holistic view of the status of the property. From our detailed 'Managers Report' - giving an absolute overview of the properties current financial position after the End of Day has been run- to an array of comprehensive occupancy, revenue and audit reports.

## Additional Modules

Apex also offers various modules for specific functions within your guest house or hotel. This includes the Banqueting Module, Activities (to book concierge services / guest activities), Point of Sale (PlusPoint POS), and Timeshare - [www.hti-systems.com](http://www.hti-systems.com)

### Additional Factors

#### BookNow Integration

Seamless integration with eRes BookNow for bookings to be completed on your corporate website - including payment!

#### 24/7 Customer Support

HTI offers free 24 seven telephonic and support for Apex and PlusPoint (property level products) for complete peace of mind

#### POS Integration

Apex offers POS integration for quick and convenient room charges to be posted on the appropriate guest folio

"In my capacity as trainer of the Hospitality Information Systems modules at the University of Pretoria, I was able to expose the students to a number of different property management systems.

Without a doubt, the vast majority of students preferred Apex as they found it more user-friendly and easier to learn than other systems. From a trainer's point of view, I found Apex to be an easy and stable product on which to train."

**Adrienne Harris – Harvest Tourism**
